## Anti Pancreatic Polypeptide (PP) (18-36) (Human) Serum

Cat. No. Y080 Lot No. 021271031

**Description:** This antiserum was raised in a rabbit by immunization with a porcine thyroglobulin (pTG) conjugate of synthetic pancreatic polypeptide (PP) (18-36) (human) peptide. The product vial contains  $50 \mu L$  of the titled antiserum obtained by lyophilizing its 0.001 M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immunohistochemistry or any other immunoreaction with PP (human).

Immunogen: Synthetic PP (18-36)(human)-pTG conjugate Host: Rabbit

Amino Acid Sequence of PP (18-36) (human)1):

APLEPVYPGD NATPEQMAQY AADLRRYINM LTRPRY-NH2

**Product Form:** Lyophilized unpurified serum Size: 50  $\mu$ L

**Reconstitution:** Reconstitute the product with 0.5mL of 0.01M PBS (pH 7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, add moderate antiseptic to the solution (e.g. NaN3 0.1%).

**Storage:** The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon reconstitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Repeated freezing-thawing should be avoided.

**Suggested Working Dilution Range:** 1:1,000-8,000 (final dilution ~1:56,000) for radioimmunoassay; 1: 1,000-4,000 for immunohistochemistry (frozen or paraffin sections). Optimal dilution should be determined by each laboratory for each application.

**Specificity** (based on radioimmunoassay): PP (18-36) (human) 100%, PP (human) 100%, NPY (human) 0%, PYY (human) 0%<sup>2)</sup>

Positive Control (immunohistochemistry): Rat pancreas

Species Tested: Human, rat<sup>3,4)</sup>
