## Anti NO Synthase I (998-1024) (Human) Serum

Cat. No. YP050

Lot No. 11990422

**Description:** This antiserum was raised in a rabbit by immunization with a carrier free synthetic NO synthase I (NOS-I, cNOS or nNOS) (998-1024) (human) peptide. The product vial contains 50  $\mu$ L of the titled antiserum obtained by lyophilizing its 0.001 M phosphate buffer (pH 7.0, 0.5mL) solution. It can be used for immunoassay, immunohistochemistry or any other immunoreaction with NO synthase I (human).

**Immunogen:** Synthetic NO Synthase I (998-1024) (human), carrier free

Host: Rabbit

Amino Acid Sequence of NO Synthase I (998-1024) (human)<sup>1)</sup>:

998

1024

AAR LLSRQNCQSP KSSRSTIFVR LHTN

Product Form: Lyophilized unpurified serum

Size: 50 uL

**Reconstitution:** Reconstitute the product with 0.5mL of 0.01M PBS (pH7.0) to make a 10 fold diluted stock solution. If it is stored in a refrigerator, add moderate antiseptic to the solution (e.g. NaN3 0.1%).

**Storage:** The product will be stable for over one year if it be stored at -20°C to -80°C until opened. Upon reconstitution, the antiserum solution must be stored at 2°C to 8°C and used within one month. Repeated freezing-thawing should be avoided.

**Suggested Working Dilution Range:** 1:2,000 (final dilution ~15,000) for radioimmunoassay<sup>2)</sup>; 1:2,000 for immunoblot; 1:9,000 for enzyme immunoassay; 1:1,000-4,000 for immunohistochemistry (frozen section)<sup>3)</sup>. Optimal dilution should be determined by each laboratory for each application.

**Specificity** (based on radioimmunoassay)<sup>2)</sup>: NO synthase I (998-1024) (human) 100%, NO synthase II (human) 0%, NO Synthase III (human) 0%

Positive Control (immunohistochemistry): Rat penis

Species Tested: Human, rat, guinea pig
